a web server for receiving the television program listings with embedded real-time data from the computer system and for providing the television program listings with embedded real-time data <u>corresponding to events being televised live</u> to the multimedia system over the Internet communications link when the user accesses the television program listings with embedded real-time data using the multimedia system.

36.   (Amended) A method for providing television program listings with embedded real-time data to a user at a multimedia system over an Internet communications link using an Internet television program guide system having a computer system and a web server, the method comprising the steps of:

providing television program listings with embedded real-time data with the computer system<u>, said real-time data corresponding to events being televised live</u>;

receiving the television program listings with embedded real-time data from the computer system with the web server; and

providing the television program listings with embedded real-time data <u>corresponding to events being televised live</u> to the multimedia system over the Internet communications link with the web server, so that the user can access the television program listings with embedded real-time data.

<u>REMARKS</u>

I.   <u>Introduction</u>

A two-month extension of time to reply to the September 30, 1999 Office Action is hereby respectfully requested. A check in the amount of $380.00 is enclosed in payment of the two-month extension of time fee.
